

ONLINE MATH COMPETITION CLASSES

MATHCOUNTS, AMC 8/10/12, AIME, USA(J)MO

Instructor: LUCIAN SEGA

- Ph.D. in Mathematics (2005), Purdue University; B.S. in Mathematics (1997), University of Bucharest, Romania.
- Former Head of EPGY Secondary Mathematics, Stanford University.
- Taught math competition classes and summer institutes/camps at Stanford University, Accord Institute for Education Research, Communication Academy, and San Jose Math Circle.
- Extensive experience with computer-based instruction, distance-learning, virtual classrooms, as well as mathematics circles, contest training, and math enrichment activities.
- Former math Olympiad participant and winner of several competitions in Romania.
- Over 10 years experience in training US students for regional and national mathematics contests; coached several USAJMO and USAMO participants in recent years.

ONLINE MATH CLASSES:

- Math competition-oriented classes for students interested in training for Mathcounts, AMC 8/10/12, AIME, USAJMO, and USAMO.
- Students learn interesting and faster ways to solve sophisticated problems and acquire greater confidence in facing mathematical challenges and increased overall interest in mathematics.
- Online live-streaming classes with audio/video and whiteboard capabilities, 4-10 weeks long.
- Small size classes (3-10 students) allow for a close interaction between students and instructor.
- No additional software needed; students only need a computer with internet access and a pair of headphones (with microphone preferred).
- All sessions are recorded and available for playback at a later time.
- Flexible times. No need to travel anywhere for class.
